

Federal Energy and Water Management AWARDS 2013

Christine Hull Department of the Army Fort Bragg, North Carolina

Christine Hull, Chief of Operations and Maintenance Division at the Directorate of Public Works at Fort Bragg, has worked for the Department of the Army for more than 16 years. At Fort Bragg she ensures that members of the Base energy team are included in every aspect of utilities maintenance and repair, allowing her team to improve day-to-day Base operations and resilience through efficiency.

The Base energy savings success is attributed to the institutionalization of Ms. Hull's Energy STORM program which: **S**ustains facilities by developing energy efficient projects; **T**rains occupants in energy conservation practices; **O**perates facilities at peak efficiency; **R**enews facilities through

retro-commissioning; and **M**easures and reports energy consumption.

Ms. Hull recently refinanced an energy savings performance contract to gain \$66 million in investments to improve controls and lighting power management, upgrade 12 central heating and cooling plants, and decrease monthly payments. She also drove the development of a Web-based application to manage and optimize work scheduling that resulted in a 4 percent increase in productivity in FY 2012 from the prior year. Her efforts have resulted in \$75.1 million in energy conservation and efficiency projects over the past three years, including \$17.5 million in FY 2012.
